MULTIPLIER EVENT

Date: 2022. 12. 21.

Location: Rest stop for cyclists, Ludaški šor 26, 24418 Šupljak

Host: Udruženje Građana Ostorka

Udruženje Građana Ostorka

- It was founded in 2003 with the aim of promoting the agricultural traditions of Vojvodina, bringing back the lost memories of Hungarian equestrian culture in the region, and promoting the development of rural tourism and environmental protection.
- The founding members include: agricultural engineer, archaeologist, ethnographer, tourism expert, local historian, geographer and biologist.
- Its operations are financed exclusively by projects.

Introduction of the project

The project is a preparatory/small-scale project in cooperation between the Váltó-Sáv Alapítvány and Udruženje Građana Ostorka, which started on 01.01.2022 and will end on 31.12.2022.

Aim:

- expanding cross-border, international contacts on the theme of sustainable development, where social reintegration and "reinvesting" (social inclusiveness) are also symbolically represented.
- developing responsible, environmentally aware behavior and attitudes, to achieve a lower environmental impact in the short and longer term, and to develop competent and responsible choices and behavior.
- to demonstrate the potential for a new start in the process of reintegration into rural life and to define the steps in the process necessary for the target group to meet the conditions for work.

The final target beneficiaries are prisoners and released persons.

Activities:

- ➔ internal trainings
- ➔ transnational meetings (3 times, 2 in Hungary, 1 in Serbia)
- ➔ multiplier events
- ➔ compilation of concrete outputs: good practice collection, methodological guide, final evaluation, results communication publication

Results, effects:

- ➔ linking green skill - soft skill - universal competence development for a specific, hard-to-reach target group, and in connection with this, strengthening social reintegration processes - a collection of good practices, which in the longer term means developing training materials.
- ➔ the emergence of new opportunities and innovations in educational and support work (collection of good practices, methodological guide).
- ➔ expanding international partnerships, preparing new projects.

Educational aid material for prisoners: Sustainable development

- The purpose of compiling and editing this material is to explore, in the context of a relatively short group development period, the topics that can be included in the concept of sustainable development and discussed with adult learners.
- The toolkit is primarily a help for the group leader: guidance/guideline both in terms of the topic and the way it is worked through.
- The compiled and edited material includes both theoretical and practical parts.
- There is often a tuning exercise at the beginning of the theory and exercises in the middle and end.
- It consists of 5 chapters, each of which is structured the following way:
 - summary ("executive summary"),
 - questions about the topic,
 - concepts (the concepts that are needed, in order to process the chapter).
- The material contains many images, making processing easier.

Sustainable development QUIZ

- ❖ The quiz also provides an opportunity to discuss topics and issues that were not part of the material (or other used educational material) or were not processed due to lack of time.
- ❖ From the questions of the quiz, a quiz of up to 10, 15, 20 questions can be freely composed, depending on how much time is available.
- ❖ Next to the quiz question, there is a short, interesting, informative piece of information about the topic or question, which is designed to further the acquisition of knowledge, skills - and even competences.
- ❖ Has game rules.
- ❖ Other group formation method suggestion (numbering, Hungarian cards, colored stickers, puzzle).

Methodological summary work document

a) Target group knowledge and field competence

Annex:

- Movie recommendations

b) Possibilities of employing ex-detainees in the ecotourism system

- Preface
- Theoretical definition of ecotourism, concepts
- Additional basic concepts of the topic
- The system of ecotourism in the EU, Hungary, and Serbia
- The training framework necessary for ecotourism service providers and employees
- Conclusions and recommendations
